Technical Skills

Frameworks & Libraries: NumPy, Pandas

Programming Languages: Python, JavaScript, SQL, HTML/CSS, C/C++

Tools & other: Git/GitHub, Google Colab, Excel, Power BI

Internship

Pragyan AI

Data Science Intern

Jan2026 – April 2026

Bengaluru, India

Personal Projects

Railway Track Fault Detection using [View Link](#)

- Arduino UNO, ESP32, Python, OpenCV, YOLOv5, and Zigbee are used.
- An IoT-based smart railway system that detects track cracks, obstacles, and fire hazards in real time.
- It automatically controls railway gates, monitors platform availability, and improves railway safety.
- AI and IoT technologies help prevent accidents and ensure efficient railway operations.

Crop Disease & Pest Prediction Analytics [View Link](#)

- Python, Streamlit, Pandas, NumPy, Scikit-learn, Plotly are used.
- Developed a web application to predict crop diseases and pest attacks using machine learning and weather-based data analysis.
- This system provides disease prediction, risk analysis, interactive dashboards, and historical data visualization for farmers.
- Implemented data preprocessing, model training, and a user-friendly Implemented data preprocessing, model training, and a user-friendly Streamlit interface for accurate and efficient decision-making.

Education

Brindavan Collage of Engineering

Information Science and Engineering (ISE)

Sept2023 – May 2026

Bengaluru, India

Bhagwan Mahavir Polytechnic

Information Technology (IT)

Sept2020 – Jan 2023

Surat, India

CERTIFICATIONS

- Pragyan AI Internship Certificate [View](#)
- C Programing Certificate [View](#)
- Future Skills for Youth [View](#)
